

JAC

CREATING SOLUTIONS WITH A PROVEN PROCESS

QUALIFIED CUSTOMERS

Qualifying our customers has been a proven success in sustaining and growing opportunities for JAC inc and our customers. Identifying the right customer, the right product, and identifying the expectations upfront are key to a successful working relationship.

PROTOTYPE

On-site prototyping provides a clear advantage in project lead times. Unique skillsets such as computer aided design engineers utilizing latest technologies designed specifically for textiles as well as artisans with creativity and assembly know how, JAC can quickly turn marketing concepts into products ready to be presented as proof of concept.

PRE-PRODUCTION

Transitioning from a prototype to full production is a key focus. During this time final revisions are put to the test from training staff, sourcing of materials, establishing lead times, establishing and documenting quality control standards in preparation of a signed approval for a full production run.

PRODUCTION

Product specific machines and techniques are utilized with stream lined efficiencies, coupled with a quality program driven to provide our customers with the highest quality products produced in a timely matter.
